DETAILED ACTION

Claim Objections

Claim 13 is objected to because of the following informalities: the phrase “engaging hole of the” is repeated in line 13-14 of page 31. Appropriate correction is required.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a push button combination lock, where the details of the combination lock are recited therein, as shown in figures 2, 5, and 7-13.
- II. Claims 13-15, drawn to a knob, for retreating a dead bolt, with coordination of a rotary gear and a push plate as shown in figures 3, 12, and 16-17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a generic handle for use in a combination lock with a rotary knob, but not necessarily for use with the claimed push button combination lock. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
